PROTOTYPE LESSON PLAN IN HOPE 3

GRADE: 12 QUARTER: 2 WEEK: 1 DAY: 1

COMPETENCY & OBJECTIVES	: Observes personal safety protocol to avoid dehydration, overexertion, hypo- and hyperthermia during MVPA participation. PEH12FH-lk-t-1 At the end of the lesson, the students should be able to: 1. Learn how to reduce the risk factors of dance-related injuries 2. Create a video presentation that shows the effectivity of first aid for musculoskeletal injuries. 3. Show enthusiasm by knowing the difference between chronic and acute Injuries
CONTENT	: Dance- Related Injuries
LEARNING RESOURCES	: https://tinyurl.com/4x97uemn PE & Health – Grade 12 SLM
PROCEDURE	: A. Preparation ➤ Start the class with an opening prayer. ➤ Checking of attendance by letting students raise their hands when they are present. ➤ Giving of friendly reminders about the Health and Safety Protocol: the proper wearing of face masks, observing and maintaining the physical social distancing to establish a safe and secure learning environment. ➤ Setting classroom rules and regulations that will promote fairness, respect, and care to encourage learning. ➤ Conduct Pre-Test to assess prior knowledge PRE-TEST Instructions: Answer the following questions by writing the letter of the BEST answer on your paper. 1. A tissue can only become an injury if: a. force is given but the impact is the same and tolerable b. force is given but the impact is lesser and absorbed c. force is given but the impact is greater 2. What is the BEST method/aid for a fractured arm? a. PRICE Method b. Ice Therapy c. Splints 3. Which is NOT a life-threatening injury? a. Concussion b. Excessive bleeding c. Sprain 4. Which is NOT an example of a chronic injury? a. Stress Fracture b. Diabetes c. Urinary Tract Infection 5. What is the BEST First-Aid for a lacerated arm?

	a. Ice Therapy b. Splint c. Application of Pressure 6. Which is NOT an example of an acute injury? a. Sprain b. Stress Fracture c. Strain 7. What is the BEST way to treat sprain? a. Application of Pressure b. RICE Method c. Ice Therapy 8. Which should be addressed FIRST in an open wound? a. Bleeding b. Infection c. Laceration 9. How can you reduce swelling? a. By elevating the injury b. By cleaning the wound c. By applying ice to the injury 10. When will a first aider administer CPR? a. When the injured person is conscious and breathing b. When the injured person has no pulse but is breathing c. When the injured person is unconscious and not breathing
	B. Motivation
	During your PE 9, have you performed first-aid? Did you know what are the injuries? We will see if you can still remember. Let's begin...
	C. Presentation
	I hope you are excited about the activities that you are going to do in this module. Now, I want you to read and understand the dance-related injuries. What is Injury? The following factors are common among dancers who have injury: 1. Poor body alignment and technique The anatomical alignment and technique of the dancer are some of the intrinsic factors that are commonly associated with injury. Dance requires moving the limbs in a controlled and precise manner. These movements are anchored to the trunk, which means that the trunk should be stable and the spine is aligned, and low trunk stability can lead to uncoordinated movements, which predispose an individual to injury. 2. Excessive training duration and intensity Excessive training and limited recovery impair the ability to heal and repair damaged issues. Intense technique training will most likely lead to microscopic injury to the musculoskeletal structures due to repetitive loading. Without proper rest and sufficient nutrition, the body is not able to rebuild the tissues and this predisposes the dancer to a severe injury. An abrupt increase in training intensity will also lead to this scenario. 3. Hard dance floor The floor is where dancers rehearse and perform. An optimal dance floor should be able to absorb the impact that is generated by the performer. A hard floor does not help in

dissipating the impact and returns the force to the dancer. The repetitive shock absorbed by the foot would eventually damage the foot or other parts of the lower extremity.

4. Poor shoe design

Footwear corrects foot mechanics and reduce the impact on the foot. A shoe that does not fit properly or has insufficient shock absorption will significantly contribute to injury risk. Furthermore, some materials used on the soles do not offer sufficient traction on the floor and this could lead to slips and falls.

5. Muscle imbalance

Muscle imbalance is an uncoordinated muscle action because of uneven strength between muscle groups. This is attributed to various factors such as anatomy, technique, and past injury. You will now learn and understand in this module the Acute and Chronic Injury...

D. Discussion/Abstraction/ Lesson Proper

Acute and Chronic Injury

These are two types of musculoskeletal injuries: acute and chronic. Acute injuries occur when the mechanical force that is absorbed by the musculoskeletal structure is more than what it is accustomed to. The onset of pain and other symptoms occur immediately after the impact. Chronic injuries occur due to repetitive trauma and the body is not given enough time to recover. The onset of pain and other symptoms occur at a gradual rate, which is usually worsened with activity or training.

Common Acute Dance-related injuries (Wozny, 2010)

Type of Injury	Cause	Symptom	Prevention
Ankle Sprain	Twists the ankle after a jump	Pain at the side of the ankle	Exercises that strengthen the ankle and improve balance
Dancer's Fracture	Twists the foot when turning	Pain at the outer part of the foot	Exercises that strengthen the foot and improve balance
Back Strain	Sudden movement of the trunk	Pain and stiffness in the low back	Proper posture and technique
ACL Tear	Twists the knee after a jump	Pain and weakness in the knee	Exercises that strengthen the knee and improve balance
Forearm Fracture	Falls on an outstretched arm	Pain and deformity near the wrist	Fall on the side or buttocks

Common Chronic-Dance related injuries

Type of Injury	Cause	Symptom	Prevention
Stress Fracture	Prolonged repetitive loading	Pain at the front of the leg (i.e. shin)	Adequate rest
Achilles Tendinosis	Excessive training	Pain near the heel in the morning	Adequate rest
Patellofemoral Pain Syndrome	Muscle imbalance	Pain at the side of the knee	Strengthening and flexibility exercises

	Plantar Fasciitis	Poor foot mechanics and hard dance floor	Pain at the sole when they take a step after sleeping	Proper technique and footwear
	Hip and Knee Osteoarthritis	Prolonged repetitive loading	Pain that worsen over time	Adequate rest

E. Exercises/ Problem Solving

Activity: ACUTE OR CHRONIC?
Instruction: Answer the following. Inside the box are different circumstances that may lead to a chronic or acute injury. Identify it, by classifying the circumstances in their respective box.

Falls on an outstretched arm Muscle imbalance Poor foot mechanics and hard dance floor Twists the knee after a jump Prolonged Repetitive loading trunk	Prolonged repetitive loading Twists the foot when turning Excessive Training Twists the knee after a jump Sudden movement of the
--	--

ACUTE INJURY	CHRONIC INJURY
1. _____	1. _____
2. _____	2. _____
3. _____	3. _____
4. _____	4. _____
5. _____	5. _____

F. Generalization

Infer your conclusions by completing the sentences below:

Out from my answers I can conclude that, a Chronic Injury happens when

_____.

While an Acute Injury happens when

_____.

And that, I could be able to reduce the risk of injuries while dancing if I will

_____.

G. Application

EFFECTIVITY OF FIRST AID FOR MUSCULOSKELETAL INJURIES

Instruction: Immobilization is an effective first aid for musculoskeletal injuries. The first aider must be resourceful and be able to use what is available in his surroundings to create a splint. Create a short video on how to immobilize an ankle sprain using materials commonly found in a dance studio such as magazines, costumes, and props. Make sure that the principles of immobilization are followed.

Create the video using the following order:

- **FIRST PART/SEGMENT** - The name of the activity, the school, the subject, and your name.
- **SECOND PART/SEGMENT** - Record yourself and answer/do the following questions:
 1. Briefly introduce yourself by telling your name, your grade level and section.
 2. Give a brief introduction of what are the risk factors in dancing.
 3. Using your answers in Activity 2, give a brief introduction of Chronic and Acute Injury.
 4. State the purpose of the video.
- **THIRD PART/SEGMENT** – Record yourself and remind your viewers of the following before doing the activity:
 1. Find a proper venue for the activity.
 2. Do warm-up routines before doing the activity.
 3. Rehydrate by drinking enough water even when you are not thirsty.
 4. End the session with a cool-down exercise to allow the body back to its course.

H. Evaluation

Your video will be evaluated using the following criteria:

CRITERIA	SCORING		
	5-10	11-15	16-25
CONTENT *Video edited gave substantial information that could help its viewers in learning the various dance steps of ballroom/hip-hop dance			
PRESENTATION *Content was delivered simply making it easy to understand.			
CREATIVITY *Music, pictures and effects were included to make the video pleasing.			
FOLLOWING INSTRUCTIONS *The video edited followed the instructions prepared by the teacher.			

I. Agreement/Assignment/ Closing

*The Performance Task will serve as their assignment.

PROTOTYPE LESSON PLAN IN HOPE 3

GRADE: 12

QUARTER: 2

WEEK: 2

DAY: 2

COMPETENCY & OBJECTIVES	:	Observes personal safety protocol to avoid dehydration, overexertion, hypo- and hyperthermia during MVPA participation. PEH12FH-Ik-t-1 At the end of the lesson, the students should be able to: 1. Discusses the general guidelines for personal safety measures 2. Develop warm-up and cool-down for dance activities 3. Reflect one's performance on observing personal safety protocols
CONTENT	:	Ballroom Dance
LEARNING RESOURCES	:	PE & Health – Grade 12 SLM https://tinyurl.com/36e55p2s
PROCEDURE	:	A. Preparation ➤ Start the class with an opening prayer. ➤ Checking of attendance by letting students raise their hands when they are present. ➤ Giving of friendly reminders about the Health and Safety Protocol: the proper wearing of face masks, observing and maintaining the physical social distancing to establish a safe and secure learning environment. ➤ Setting classroom rules and regulations that will promote fairness, respect, and care to encourage learning. ➤ Conduct Pre-Test ACTIVITY 1- PRE-TEST Instruction: Using any clean paper available at hand, identify whether the statement given is correct or not. If the statement is correct, write TRUE on the space provided before each number. If not, encircle the word that makes the statement incorrect. _____ 1. Drinking water before doing warm-up activities is a must. _____ 2. Warm-up routines are done as an ending to help the body relax before any physical activity. _____ 3. It is fine to wear slippers during a physical activity because its comfortable. _____ 4. Find the proper venue for the planned dance activities. _____ 5. Start the session with a warm-up activity. _____ 6. Drink water only when you are thirsty. _____ 7. Rest should only be given when the physical activity is vigorous. _____ 8. Always end the session with a cool down exercise to allow the body back to its course. _____ 9. Specific instructions every activity should be planned thoroughly. _____ 10. Eating a full course meal 2 hours before the session will give the body enough energy for any physical activity.
		B. Motivation 1. Have you engaged on a dance contest? 2. How was the dance preparation and practice?

	3. Did you experienced having a fatigue due to overtraining?																								
	4. How did you overcome it?																								
	C. Presentation																								
	Dancing is a great way to be more active and offers a wide range of physical and mental benefits. Dance styles range from ballroom and jazz ballet to hip-hop and belly dancing – you're sure to find a style that suits you.																								
	However, the range of body movements, repetition and speed of movement can put you at risk of an injury, particularly if you are new and learning unfamiliar steps. You can help reduce your risk of injury by being aware of some of these risk factors.																								
	D. Discussion/Abstraction/ Lesson Proper																								
	Reducing the risk of dance injuries																								
	You can reduce your risk of injury when dancing if you follow some simple guidelines. Some tips include:																								
	• See your doctor for a check-up if you have a medical condition, are overweight, are over 40 years of age or haven't exercised regularly for a long time. • If you have a pre-existing problem or injury especially to the foot, ankle, or lower back, consult your doctor or physiotherapist before starting. • Choose a dance style that is appropriate for you. Have a basic awareness of your own body and of your own personal limits and boundaries. • Warm up thoroughly before you start dancing. This is important in preparing the body for dancing. • Cool down after a dance session. • Drink plenty of water before, during and after dancing. • Wear layers of clothing that you can take off as your body warms up. • Wear professionally fitted shoes appropriate to your style of dance. Proper dance shoes distribute load, absorb impact, and support your foot. • Don't push yourself too far or too fast, especially if you are a beginner. • Concentrate on correct posture and your dance technique. The way a dancer connects one movement to another must be technically correct so as not to twist the body incorrectly or strain a muscle. • Talk with your dance instructor if you have a problem or injury. They may be able to modify the move and teach you a variation to reduce the risk factors. • Sit down and watch, sometimes you can learn more from watching than doing something for the first time. • Make sure you take sufficient rest between dance sessions, especially if you are new to dancing or are not very fit. This will help minimize muscle soreness or stiffness.																								
	E. Exercises/ Problem Solving																								
	Direction: Make your personal safety protocol to avoid dehydration, overexertion, hypothermia, and hyperthermia during moderate-vigorous dance participation by filling out the table.																								
	<table><tr><th colspan="4">MY PERSONAL SAFETY PROTOCOL</th></tr><tr><th></th><th>BEFORE</th><th>DURING</th><th>AFTER</th></tr><tr><td>Dehydration</td><td></td><td></td><td></td></tr><tr><td>Overexertion</td><td></td><td></td><td></td></tr><tr><td>Hypothermia</td><td></td><td></td><td></td></tr><tr><td>Hyperthermia</td><td></td><td></td><td></td></tr></table>	MY PERSONAL SAFETY PROTOCOL					BEFORE	DURING	AFTER	Dehydration				Overexertion				Hypothermia				Hyperthermia			
MY PERSONAL SAFETY PROTOCOL																									
	BEFORE	DURING	AFTER																						
Dehydration																									
Overexertion																									
Hypothermia																									
Hyperthermia																									
	F. Generalization																								

What are the important things you have learned as you go through this lesson? Are you going to apply those tips when engaging dance activities?

Complete the sentences below:

Before engaging dance activity, to reduce the risk of injuries I learned that I need to

After the dance activity, I need to

I realized that observing the personal safety protocols in dancing is very important because

G. Application

LET'S DO THIS!

*Form a group of 6-8 members

1. Let the students develop a simple dance routine (3-5minutes) applying the basic ballroom dance movements for warm-up and cool-down exercise.
2. Practice for 20 mins.
3. Observe utmost care while doing the activity to avoid injuries.
4. Present it to the class.
5. Your Performance will be rated according to the following criteria: attitude, respect, initiative and participation, dependability, execution, and observance of safety.

H. Evaluation

Directions: Using the rubric, write the level of each component and add the weighted scores in one -fourth sheet of paper. The highest score is 24.

Criteria	Advanced (4)	Proficient (3)	Approaching Proficiency (2)	Developing (1)
Attitude	Positive attitude, always willing to try	Positive attitude, most often willing to try	Inconsistent attitude, needs some encouragement	Poor attitude; Does not respond to encouragement
Respect	Always courteous and respectful of others	Often courteous and respectful of others	Sometimes courteous and respectful of others	Disrespectful of others
Initiative and Participation	Consistently attends, prepares, and participates in the activities	Often attends, prepares, and participates in the activities	Sometimes attends, prepares, and participates in the activities	Does not attend, prepare, and participate in the activities
Dependability	Very dependable	Dependable	Inconsistently dependable	Not dependable
Execution	Always executes the movements properly	Often executes the movements properly	Sometimes executes the movements properly	Does not execute the movements properly
Observance of Safety	Always practices safety precautions	Often practices safety precautions	Sometimes practices safety precautions	Does not practice safety precautions

I. Agreement/Assignment/ Closing

*The teacher will remind the students to always observe safety measures in school and at home.

PROTOTYPE LESSON PLAN IN HOPE 3

GRADE: 12 QUARTER: 2 WEEK: 3 DAY:3

COMPETENCY & OBJECTIVES	:	Demonstrates proper etiquette and safety in the use of facilities and equipment. PEH12FH-Ia-t-12 At the end of the lesson, the students should be able to: 1. Identify the Ballroom dance Etiquette 2. Create a Slogan for Promoting the Proper Utilization and Safety Management Strategy for Dance Studios. 3. Appreciate the importance of observing the proper usage of different facilities and equipment on Popular Styles of Dance sports
CONTENT	:	BALLROOM DANCING
LEARNING RESOURCES	:	PE & Health Grade-12 SLM https://tinyurl.com/3cpcrxw2
PROCEDURE	:	A. Preparation ➤ Start the class with an opening prayer. ➤ Checking of attendance by letting students raise their hands when they are present. ➤ Giving of friendly reminders about the Health and Safety Protocol: the proper wearing of face masks, observing and maintaining the physical social distancing to establish a safe and secure learning environment. ➤ Setting classroom rules and regulations that will promote fairness, respect, and care to encourage learning. B. Motivation Activity: Think It! Before you do it! Direction: Answer the following question below after reading the scenario. You are invited by your friend to dance with her other friends on a dance floor because it is her 18th birthday. You are just a beginner, and you accidentally bump into someone, what will do? How will you properly approach that person? C. Presentation The Proper Etiquette That I Would Like to Know More About This activity allows you to share your knowledge about the proper etiquette in which brings out your expectations of the lesson, your prior knowledge and skills, and a specific activity you want to learn more about. Copy and answer the table in your activity notebook.

Here are your tasks:

1. Study the following K-W-L chart below. Under the first column K, write at least 5 things you already know about a certain etiquette in using facilities and equipment.

Under the second column W, write at least 3 things you want to know more about.

Don't write anything yet on the L column. You will accomplish this after discussing the first two columns.

K What I Know	W What I Want to Know	L What I've Learned

2. Write a brief explanation of the things you KNOW and the things you WANT to KNOW TO your friends, relatives, and family members.

3. After sharing, submit your paper to the teacher.

D. Discussion/Abstraction/ Lesson Proper**Ballroom Dance Etiquette**

Ballroom dance etiquette ten common sense tips.

- 1) Dance in the line of dance. Ballroom dancers move around the floor in a counter-clockwise direction. You should be moving in this direction most of the time. This is ballroom dance etiquette 101.
- 2) When things go wrong, apologize. If you bump into someone, or step on someone's foot, tell them you're sorry. Don't just ignore them.
- 3) Slow dancers should move to the center of the room. So if you are a beginner to ballroom dance, just learning new moves, don't clog up the main lines of dance. Stay towards the center.
- 4) Conversation should be off the dance floor. If you'd like to talk, do it off the dance floor.
- 5) Cross the dance floor around the perimeter. Don't cut through. I've seen people walk across the middle of the ballroom dance floor holding drinks. Not good.
- 6) Clean up your mess. So, if you are carrying some drinks and you do spill something, clean it up before some dancer slips and gets hurt.
- 7) Personal hygiene. Make sure you don't have bad body odor or bad breath. Very important ballroom dance etiquette.
- 8) Dance at your partner's ability. If you are an experienced ballroom dance leader dancing with a beginner follower, don't expect her to do advanced moves. Build the dance. Start with easy stuff. Once you see that she's with the timing and following easy patters, try advancing to more difficult ones. If she has difficulty doing one turn, don't lead her into a double turn.
- 9) Sneezing and coughing while dancing. This does happen. Always sneeze or cough into the underside of your elbow. Do not sneeze into your hand and then ask her to take that hand for dancing.
- 10) Don't chew gum while dancing. This is annoying to your partner. He or she doesn't want to dance with a cow chewing grass, which is what it feels like. It also doesn't look elegant.

	E. Exercises/ Problem Solving “Proper Etiquette Journal” Directions: Create a Self-Reflective Journal that contains your detailed fitness habits. A reflective journal is a place to write down your reflection on fitness habits. It can be something good or bad that has happened to you that you can self-reflect on how you apply and observe proper etiquette. Specify how you observe proper manners when using equipment and facilities in a gym and dance studios. Write it in your activity notebook. F. Generalization Complete the following statements. I have learned that... _____. I discovered that... _____. I understand that... _____. G. Application “Slogan Making” Direction: Create a Slogan for Promoting the Proper Utilization and Safety Management Strategy for Dance Studios. Use separate paper or any clean sheet of bond paper for your activity. The following criteria will be the bases for scoring Creativity - 20% Content - 50% Originality - 30% H. Evaluation Direction: Choose the correct answer from the given choices. Write the letter of your answer in your activity notebook. 1. Shouting and grunting inside the dance studio can A. Distract other people B. Help others gain strength C. Lose weight D. Caused injury 2. Used supplies and equipment such as empty water bottles should be thrown in A. Lockers B. Trash bins C. Machine Weights D. Treadmill 3. Wiping equipment down with disinfectant can stop the spread of _____. A. germs B. virus C. bacteria D. all of the above
--	---

	4. How does one practice proper hygiene and care. A. Never use deodorant and take a bath daily B. Force, yourself to engage in physical activity even if you are feeling sick. C. Take a bath or use deodorant if needed D. All of the above 5. What is a general rule in proper etiquette and safety in the use of facilities and equipment? A. Be polite B. Be naughty C. Be friendly D. Be nice
	I. Agreement/Assignment/ Closing
	*Ask the students to prepare a dance routine applying the proper etiquette in dancing to be presented next meeting.

Republic of the Philippines

 City of Tagbilaran

PROTOTYPE LESSON PLAN IN HOPE 3

GRADE: 12 QUARTER: 2 WEEK: 4 DAY: 4

COMPETENCY & OBJECTIVES	Demonstrates proper etiquette and safety in the use of facilities and equipment. PEH12FH-Ia-t-12 : At the end of the lesson, the students should be able to: 1. Discusses the general guidelines for a dance class rules one should follow 2. Develop warm-up and cool-down for dance activities 3. Reflect one's performance on observing proper etiquette and safety
CONTENT	: Ballroom Dancing
LEARNING RESOURCES	PE & Health Grade-12 SLM : https://tinyurl.com/mvuxcdww https://tinyurl.com/58wv55pj
PROCEDURE	: A. Preparation ➤ Start the class with an opening prayer. ➤ Checking of attendance by letting students raise their hands when they are present. ➤ Setting classroom rules and regulations that will promote fairness, respect, and care to encourage learning. B. Motivation 4 PICS 1 WORD!: A Guessing Game     <u>ETIQUETTE</u>

	C. Presentation Dance etiquette is a set of guidelines that help us navigate the social dimensions of dancing. Why do we care about dance etiquette? Because it is nice to know how to go about in the dancing circles. It makes the difference between having a happy or unhappy dancing experience, the difference between people wanting, or not wanting to dance with you. D. Discussion/Abstraction/ Lesson Proper ➤ What to wear? - Your outfit and accessories should be comfortable, safe, and also reflect the culture and level of formality of the dance group. Most importantly, do not forget your dance shoes. ➤ Personal Grooming Dancing is an activity where two people come in close contact. Before a dance: ➤ Shower and use a deodorant, ➤ Brush teeth and use mouthwash or breath mint, ➤ Abstain from foods that produce strong odors, like those heavy in garlic ➤ The odor of cigarettes on one's breath or clothing can be very unattractive. During a dance: ➤ Check your grooming periodically ➤ During active dance sessions, freshen up and towel off periodically in the bathroom ➤ Gentlemen, you can carry an extra shirt with you to the dance in case you need a change. Asking for a Dance ➤ When asking for a dance, it is easiest to stay with traditional phrases: ➤ "May I have this dance?" ➤ "May I have this Waltz/Rumba/Foxtrot/etc." ➤ "Would you like to dance?" ➤ "Care to dance?" ➤ "Shall we dance?" ➤ Ask everyone to dance. Do not monopolize one partner for the whole night. ➤ Today's beginners will be the good dancers of tomorrow, so be nice to them and dance with them. ➤ Do not decline a dance unless you absolutely have to. Having declined a dance, you cannot dance the same song with someone else. ➤ Be considerate of other couples on the floor. Exercise good floor craft. Do not cut other couples off. No aerals or choreographed steps on the social dance floor! ➤ Stationary dancers (e.g. Swing dancers) stay in the middle, traveling dancers move on the boundary along the line of dance. ➤ Avoid patterns that your partner cannot do: dance to the level of your partner. ➤ Never blame your partner for missteps. ➤ No unsolicited teaching on the floor! ➤ Smile, be warm, be personable, be nice.
--	---

E. Exercises/ Problem Solving

Activity: *Ballroom Dancing Participation Questionnaire*

Direction: Tick the column that best describes your participation in the activities below.

No.	Ballroom Dancing Activities	Always	Seldom	Never
1	I actively participant in ballroom dancing activities in my community or school.			
2	I am a member of the grand cotillion dance performed in a friend's debut/ social gathering.			
3	I wear proper attire in ballroom dancing activities.			
4	I am confident in performing ballroom dances in and out of school.			
5	I insist in doing a dance combination that my partner could not follow			
6	I don't follow the lead of my partner because I have my own style of dancing.			
7	I dance vigorously whenever I participate in ballroom distancing activity.			
8	I recognize the advantages of my engagement in ballroom dancing activities to my fitness and well-being.			
9	I share my ballroom dancing skills with my friends, family, and community.			
10	I enjoy participating in ballroom dancing			

F. Generalization

Why does etiquette and safety must be kept in mind before doing any dance practices?

Why is it important to observe proper etiquette and safety measures when dancing?

G. Application

LET'S DO THIS!

*Form a group of 6-8 members

1. Let the students develop a simple dance routine (3-5minutes) applying the basic ballroom / hip-hop dance movements for **warm-up and cool-down exercise.**
2. Practice for 20 mins.
3. Observe utmost care while doing the activity to avoid injuries.

4. Present it to the class.
5. Your Performance will be rated according to the following criteria: attitude, respect, initiative and participation, dependability, execution, and observance of safety.

H. Evaluation

Directions: Using the rubric, write the level of each component and add the weighted scores in one -fourth sheet of paper. The highest score is 24.

Criteria	Advanced (4)	Proficient (3)	Approaching Proficiency (2)	Developing (1)
Attitude	Positive attitude, always willing to try	Positive attitude, most often willing to try	Inconsistent attitude, needs some encouragement	Poor attitude; Does not respond to encouragement
Respect	Always courteous and respectful of others	Often courteous and respectful of others	Sometimes courteous and respectful of others	Disrespectful of others
Initiative and Participation	Consistently attends, prepares, and participates in the activities	Often attends, prepares, and participates in the activities	Sometimes attends, prepares, and participates in the activities	Does not attend, prepare, and participate in the activities
Dependability	Very dependable	Dependable	Inconsistently dependable	Not dependable
Execution	Always executes the movements properly	Often executes the movements properly	Sometimes executes the movements properly	Does not execute the movements properly
Observance of Safety	Always practices safety precautions	Often practices safety precautions	Sometimes practices safety precautions	Does not practice safety precautions

I. Agreement/Assignment/ Closing

“Etiquette is here to ensure everyone has a good time in a social dance setting, so pay attention to it.”

PE & HEALTH 12 PROTOTYPE LESSON PLAN

GRADE: 12 QUARTER: 2 WEEK: 5 DAY: 1

COMPETENCY & OBJECTIVES	:	Participates in an organized event that addresses health/dance issues and concern Specific Objectives: At the end the lesson the learners are expected to; a. Identify the different health/issues and concerns. b. Create a not less than 3-minute dance routine. c. Assess oneself regarding their participation in any dance activities and appreciate its benefits to one's health.
CONTENT	:	Addressing Health Issues Through Participating in an Organized Dance Events
LEARNING RESOURCES	:	Learning Activity Sheet DepEd Physical Education and Health Learner's Manual
PROCEDURE	:	A. Paghahanda: (Preparation) Start Here. • Opening Prayer • Checking of Attendance • Setting the mood
		B. Pagganyak: (Motivation) Activating Prior Knowledge: The teacher presents pictures on the different health issues and concerns. - Obesity - Vices - Nutrition - And other Non-Communicable Diseases • Teacher asks questions 1. What can you say about the pictures presented? 2. How can we avoid these situations? - This question will lead to participation in dance activities to address these health issues / concerns.
		C. Paglalahad: (Presentation) • Teacher discusses the value of participating in dancing activities.
		D. Pagtatalakay: (Discussion/Abstraction/ Lesson Proper) • Teacher presents possible health problems / issues due to physical inactivity.
		E. Paghahasa (Exercises/ Problem Solving) • Students identify dance fitness activities initiated by the LGU and Non-Government Organization in their respective community or municipality. • Students assess themselves regarding their participation to dance activities initiated by the LGU or private sectors. - How many times they have participated in any of these dance activities in a year?

	- Cite a specific dance activity they participated or witnessed. - How they feel after participating or witnessing the activity?
	F. Paglalahat: (Generalization)
	• Teacher asks students how participation in dance activities could benefit one/s health.
	G. Paglalapat (Application)
	• The class will be divided into 5 groups. Using the fundamental movements (Locomotor and Non-Locomotor), each group will create a not less than 3-minute dance routine. The dance could be folk, jazz, modern, contemporary, or a combination of any, or other dance genre.
	H. Pagtataya: (Evaluation)
	• Presentation of dance performance • Rubric will be used in rating students' performance.
	I. Kasunduan/Takdang Aralin (Agreement/Assignment/ Closing)
